

MEALMATE WEEK#3

Write-Up:

This week I designed the Favorites screen, Weekly Planner, Add to Plan flow, and the empty and loading states. Two things I would like feedback on:

1. First, after a meal is added to the plan, a confirmation screen appears with a checkmark and a View Planner button, instead of just closing the popup. Not sure if this extra step is helpful or unnecessary.
2. Secondly, I added a three dot menu on each day in the Weekly Planner for future edit and remove options, even though the brief only asked for viewing this week, so wanted your feedback to know that in case it is more than needed.
